

Land Use Class Codes

Urban (1)

- 10 roaded for development (no buildings built yet)
- 11 Residential
 - 11.4 --Multi-family (apartments)
 - 11.3 --high density (up to 1/4 acre)
 - 11.2 --medium density (up to 1 acre)
 - 1 -with primarily forest land cover
 - 2 -with primarily grass land cover
 - 11.1 --low density (up to 5 acre)
 - 1 -with primarily forest land cover
 - 2 -with primarily grass land cover
- 12.1 Commercial/industrial
- 12.2 commercial/industrial that doesn't meet the approx 75% impervious surface criteria (often 'rural commercial?')
- 13.1 Urban open ? assumes approx 75% grass or tree cover
- 13.2 Urban open -- when there are more buildings and impervious surfaces
- 14 Transportation
- 15 Powerlines
- 16 Recreation

Agriculture (2)

- 21 Pasture
- 22 Crop
- 23 Orchard

Rangeland (3)

- 31 Shrub and herbaceous

Forest (4)

Water (5)

- 51 River
- 52 Lake
- (53 Pond)
- 54 Estuary
- 55 Marsh/wetland

Barren (7)

- 71 Cleared for development
- 72 Bare soil/mining

*MMU's:

1 acre mmu -- nothing is mapped that is < 1 acre in size and < 120 feet in width.

5 acre mmu ? is applied for inclusions inside developed landuses (urban and ag). Also applied is a minimum width of 330 feet for these inclusions (derived from a 1:2 long:short axis for the minimum 5 acre area). Examples of such inclusions would be: forest area within residential, forest within transportation, commercial within residential, agriculture within residential, transportation within commercial, etc.

Defaults: areas less than the required mmu were grouped with its most similar neighbor. E.g. roads (which are typically < 120 ft in width) with forest on one side and residential on the other were grouped with the residential land use.
